Safe Harbor

Safe harbor statement under the Private Securities Litigation Reform Act of 1995:

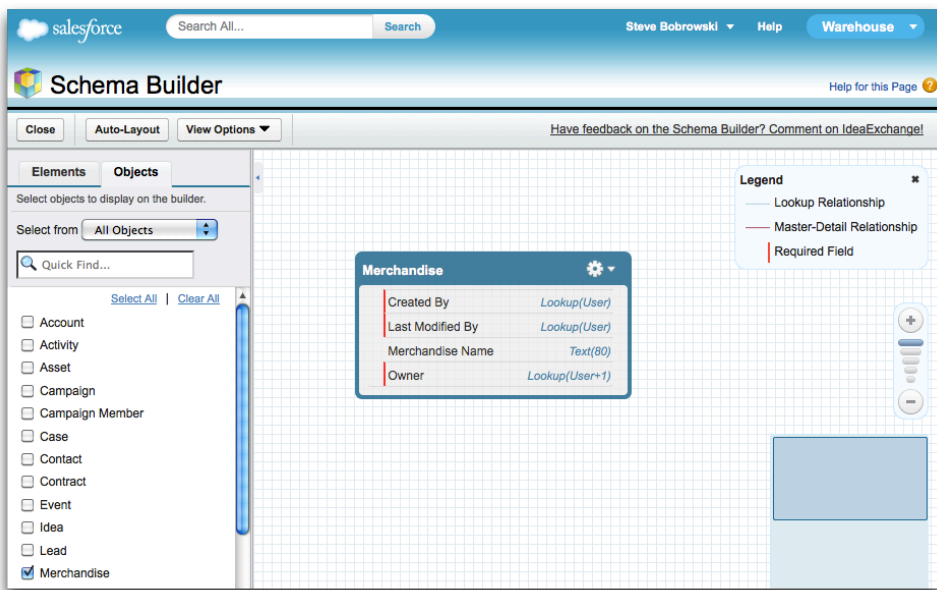

This presentation may contain forward-looking statements that involve risks, uncertainties, and assumptions. If any such uncertainties materialize or if any of the assumptions proves incorrect, the results of salesforce.com, inc. could differ materially from the results expressed or implied by the forward-looking statements we make. All statements other than statements of historical fact could be deemed forward-looking, including any projections of product or service availability, subscriber growth, earnings, revenues, or other financial items and any statements regarding strategies or plans of management for future operations, statements of belief, any statements concerning new, planned, or upgraded services or technology developments and customer contracts or use of our services.

The risks and uncertainties referred to above include – but are not limited to – risks associated with developing and delivering new functionality for our service, new products and services, our new business model, our past operating losses, possible fluctuations in our operating results and rate of growth, interruptions or delays in our Web hosting, breach of our security measures, the outcome of any litigation, risks associated with completed and any possible mergers and acquisitions, the immature market in which we operate, our relatively limited operating history, our ability to expand, retain, and motivate our employees and manage our growth, new releases of our service and successful customer deployment, our limited history reselling non-salesforce.com products, and utilization and selling to larger enterprise customers. Further information on potential factors that could affect the financial results of salesforce.com, inc. is included in our annual report on Form 10-K for the most recent fiscal year ended January 31, 2011 and in our quarterly report on Form 10-Q for the most recent fiscal quarter ended July 31, 2011. These documents and others containing important disclosures are available on the SEC Filings section of the Investor Information section of our Web site.

Any unreleased services or features referenced in this or other presentations, press releases or public statements are not currently available and may not be delivered on time or at all. Customers who purchase our services should make the purchase decisions based upon features that are currently available. Salesforce.com, inc. assumes no obligation and does not intend to update these forward-looking statements.

Create a data model for a warehouse application which can be easily extended with business logic for internal and external applications

Declarative App Building

Allows for the creation of data models and business logic without adding programmatic logic

Custom Objects

Custom Fields

Validation Rules

Workflows

Approvals

Create a data model for a warehouse application which can be easily extended with business logic for internal and external applications

Warehouse Application Requirements

- To have a system which allows tracking of price, and inventory on hand for all merchandise
- To have a system which allows the creation of invoices containing one more merchandise items as a line item on the invoice
- To have an invoice which presents total invoice amount and current shipping status

What are the nouns in our requirements?

Warehouse Application Requirements

- To have a system which allows tracking of price, and inventory on hand for all merchandise
- To have a system which allows the creation of invoices containing *one more merchandise items* as a line item on the invoice
- To have an invoice which presents total invoice amount and current shipping status

Warehouse Application Requirements

- To have a system which allows tracking of price, and inventory on hand for all merchandise
- To have a system which allows the creation of invoices containing one more merchandise items as a line item on the invoice
- To have an invoice which presents total invoice amount and current shipping status

Warehouse App Data Model

Invoice			
Number	Status	Count	Total
INV-01	Shipped	16	\$370
INV-02	New	20	\$200

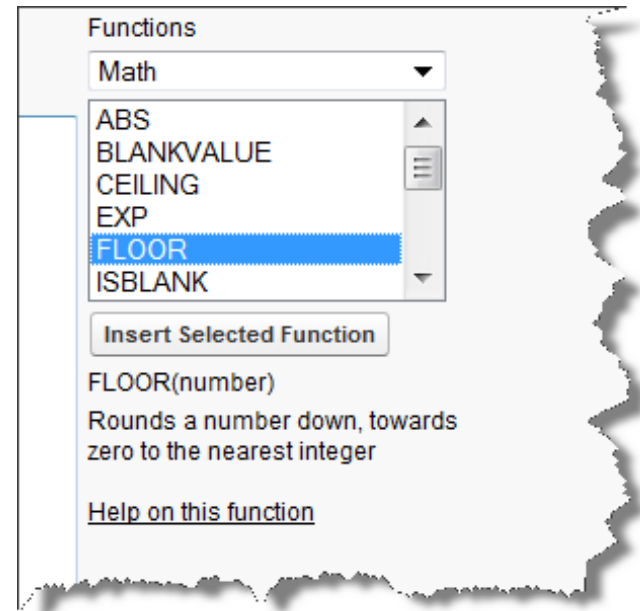

Invoice Line Items					
Invoice	Line	Merchandise	Units Sold	Unit Price	Value
INV-01	1	Pinot	1	15	\$20
INV-01	2	Cabernet	5	10	\$150
INV-01	3	Malbec	10	20	\$200
INV-02	1	Pinot	20	50	\$200

Merchandise		
Name	Price	Inventory
Pinot	\$20	15
Cabernet	\$30	10
Malbec	\$20	20
Zinfandel	\$10	50

Create a data model for a warehouse application **which can be easily extended with business logic** for internal and external applications

Functions in Formulas

- ‘Pre-packaged’ operations for performing common logic
- Support for commons functions
 - Math
 - Text
 - Date & Time
 - Logical
- Can chain functions together
AND (OR (
 ISPICKVAL(StageName, "Closed Won"),
 ISPICKVAL(StageName, "Negotiation/Review")),
 ISBLANK(Delivery_Date__c))

Formulas can to define business logic

Validation rules

Workflow rules

Approvals

New Requirement:

- A user can not buy more items than are in stock

Look for assertions.

If

Implied on
record save.

Then

Formula evals
true (error) or
false (save)

Error

Return error
message
(UI or API)

New requirement:

When

- Every time a line item is added to an open invoice we need to update inventory stock counts.

Why

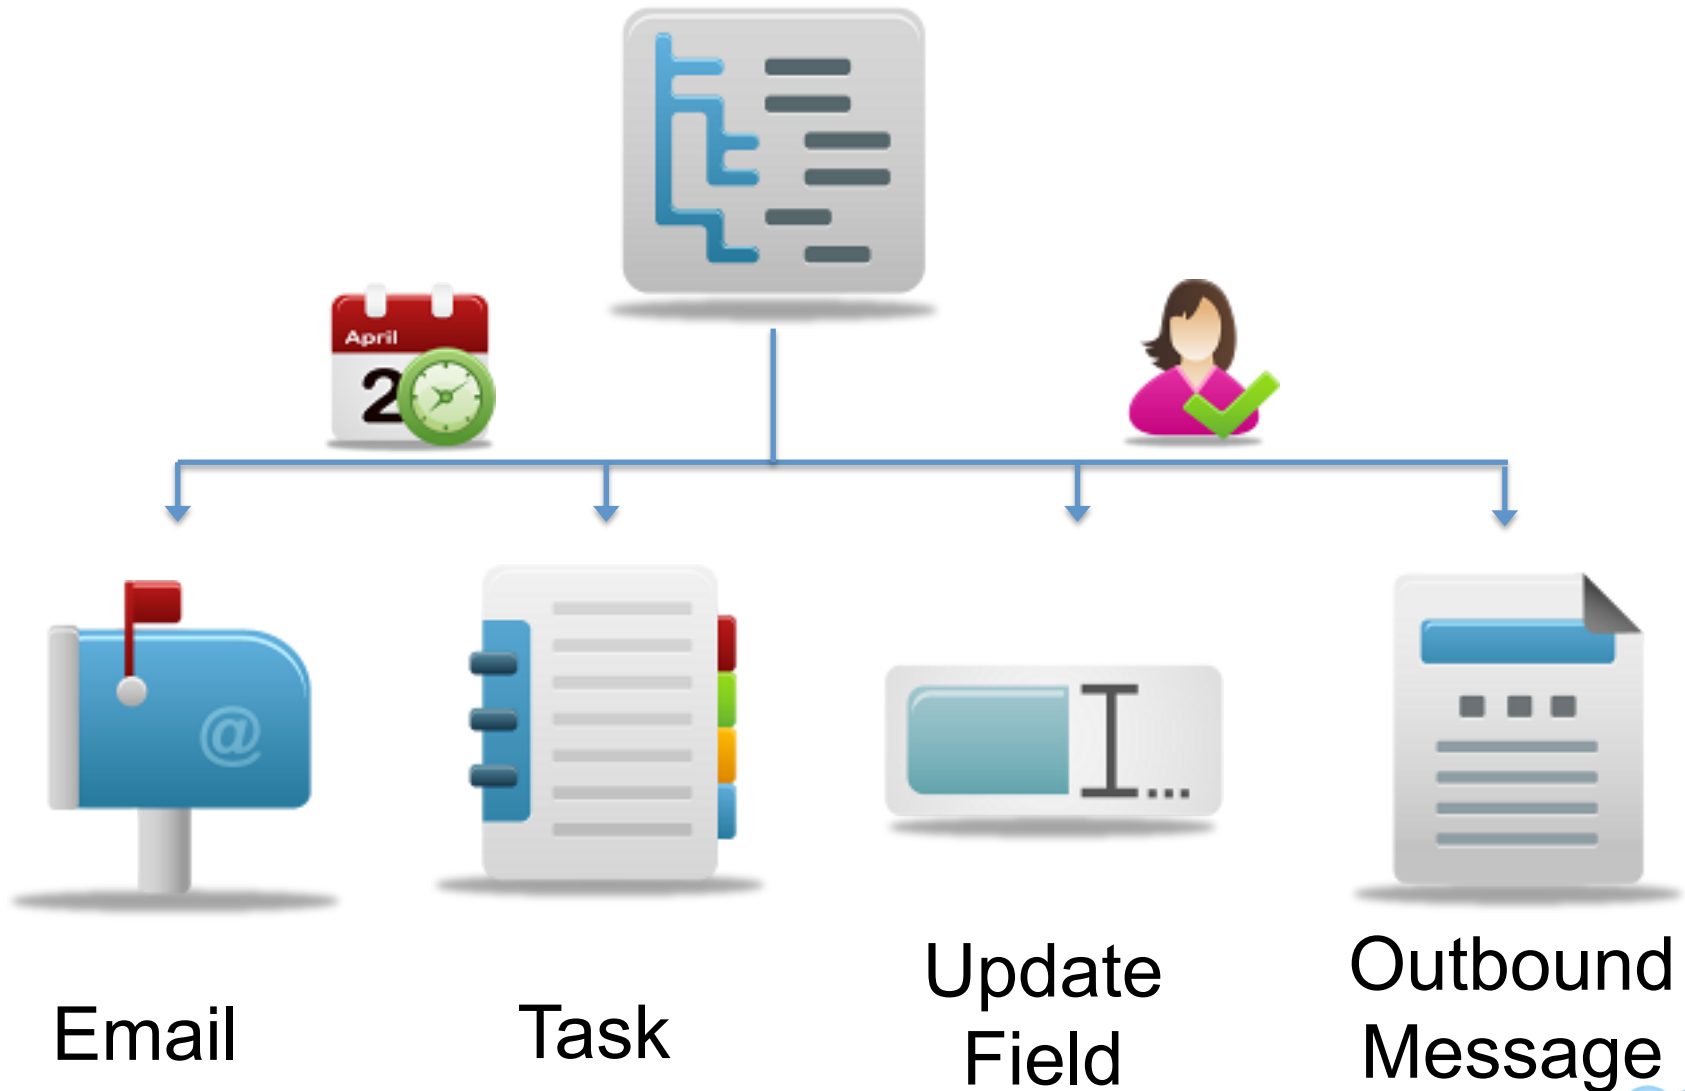

What

Look for time-based queues.

Workflow & Approvals

Workflow Rule
Line Item Created

[Help for this Page](#) ?

What

Workflow Actions [Edit](#)

Immediate Workflow Actions

Type	Description
Field Update	Update Stock Inventory

Time-Dependent Workflow Actions

This rule does not support time-dependent workflow actions. [Learn more](#)

New Requirement:

- Every time an order greater than \$1000 is placed a manager needs to sign off on it.

Human (role) interaction

Approvals allow

Single/Multi/Skip step processes

Route based on roles, or queues

Approval via emails

Automation of manual processes

Define Actions

Process Definition Detail [Edit](#) [Clone](#) [Deactivate](#) [View Diagram](#)

Process Name: Large Invoice Value Active ☒

Unique Name: Large_Invoice_Value Next Automated Approver Determined By: Manager of Record Submitter

Description:
Entry Criteria: Invoice Value GREATER THAN 2000
Record Editable: Administrator ONLY Allow Submitters to Recall Approval Requests ☐

Approval Assignment: Large Invoice Template
Email Template:
Initial Submitters: Invoice Statement Owner
